EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Sacco on November 1, 2004.

Amend claims 22 and 23:

Claims 22 and 23 should depend from claim 14 and not 13. (The method according to claim [13] 14...).

Allowable Subject Matter

Claims 1 - 23 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 14:

Applicant's cited prior art of Gripshover et al. or Moller neither teach or suggest the limitations of the independent claims.

Gripshover et al. teaches a liquid filled capacitor using dielectric liquids where examples of the dielectric fluid are non-magnetic fluids such as glycol, water, or glycerin, where it is not suggested or obvious to substitute a magnetic fluid for the non-magnetic fluids taught by Gripshover et al., thus the liquid not being magnetically coupled to the filter element as recited in claims 1 and 14.

Art Unit: 2817

Moller teaches using a dielectric liquid for tuning an integrated circuit where the embodiment is drawn to a mere conducting strip or stripline which cannot be defined as an RF filter. As with Gripshover et al., Moller merely teaches using a dielectric fluid with no suggestion the fluid comprising a liquid magnetic material, thus no magnetic coupling occurs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean O Takaoka whose telephone number is (571) 272-1772. The examiner can normally be reached on 8:30a - 5:00p Mon - Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571) 272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/647,749

Art Unit: 2817

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
